

Heavy duty electric concertina ladder in alloy for use in premium applications.

CUSTOMER PROFILE:

- **Domestic customers** who want the convenience of an automated operating system. Maximum in strength and load capacity.
- **Commercial customers** who want an electrically operated heavy duty ladder for safe and easy specific internal access for storage or to access air-conditioning, telecommunications, electrical, plant or other equipment.

CUSTOMER BENEFITS:

- German engineered, tested and certified to EN 14975 (European Ladder Standard).
- 24 volt low noise drive equipped with automatic limit stop and safety stop, plus emergency power supply.
- 2 wall switches included.
- Meets the provisions of the Building Code of Australia (BCA).
- Range of height applications for maximum convenience.
- Top step is mounted in box for easy exit from ladder.
- Wide, deep non-skid treads and gentle 65° ladder angle mean safe, easy climbing.
- Articulated hatch offers maximum climbing safety.
- Wide 700mm opening in choice of various lengths gives maximum everyday access and fits space constraints.
- Constructed of all alloy and plated parts for strength, durability and reliability.
- Adjustable double heavy duty tension and control springs and heavy duty hinges for easy, safe opening and closing operation.
- Strong, stable 200kg per step load capacity for long life with heavy or commercial use.
- Handrail is standard for climbing stability.

TECHNICAL SPECIFICATIONS:

Columbus Electric metal concertina ladder

Model	Cut-out Size* (A/B)	Floor-ceiling(E) (No of treads)	Standout (C)	Foldout (D)
